

Chandah Space Technologies (CST), a U.S. company, is building its InsureSat constellation of electro-optical sensors for commercial in-orbit inspections and space situational awareness (SSA) – markets that are emerging on the horizons of increasing innovations and global space activities.

CST's products and services are geared towards:

- In-orbit health confirmations of expensive, high-value satellites.
- Solutions for space sustainability, with a high ROI for the industry.
- Enabling innovative new solutions and services in asset management and optimization.

CST's founding team and Board have a strong record of innovation in the aerospace industry, in corporate governance, and for enterprise value creation, and the company is privileged to have received a Non-Earth Imaging (NEI) license from the U.S. Department of Commerce (NOAA). The company is developing best-in-class industry partnerships and technologies ecosystem to bring its unique, transformative solutions to the marketplace.
